

Priority Payments

Features and functionality of Priority Payments versions:

Priority Payments delivers a complete, end-to-end solution for customer payment management. The module supports the reception of payments through various advanced methods, including credit cards, Bit, and bank transfers, compatible with any platform, worldwide, and in any currency. Utilizing the Priority Payments module enhances the efficiency of the collection process, significantly saving time and offering customers a modern and streamlined payment experience.

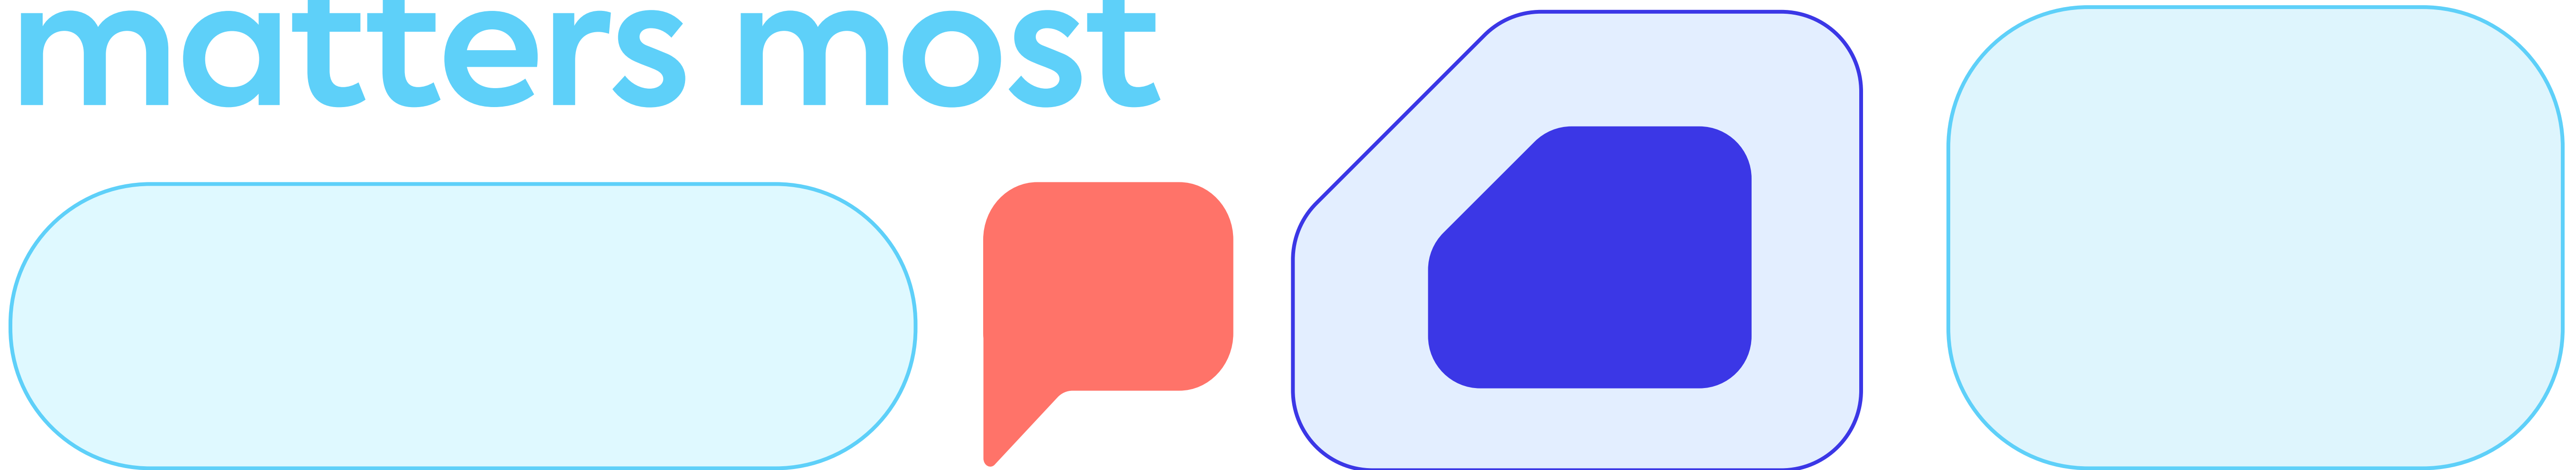

Key Benefits

The Priority's payment module is a critical component that handles various financial transactions related to payments. It is a smart solution that is fast and easy to set up, decreases time, use of resources and headcount costs. Among the many benefits offered to organizations:

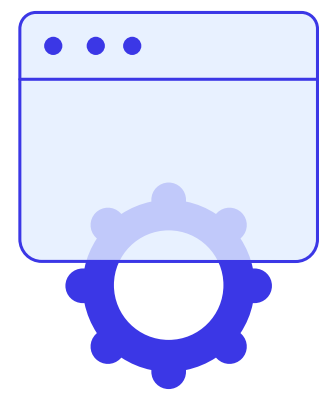

- ▶ Enhance the customer experience with frictionless payments
- ▶ Eliminate costly errors
- ▶ Business insights
- ▶ Single data source/platform
- ▶ Fully embedded with Priority's financial tools such as the billing module
- ▶ Tight control over cash flow
- ▶ Simplify complex business processes
- ▶ Easy reconciliation

Full financial visibility where it matters most

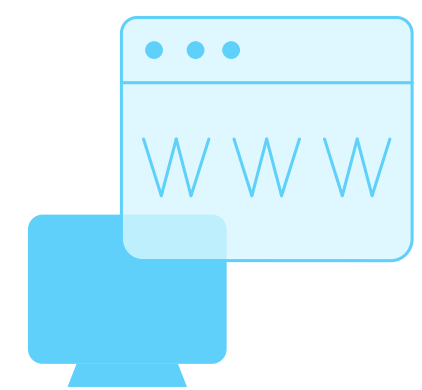

Key Features

Payment processing

Process credit card transactions and additional payment methods (eg. PayPal, ACH, Apple Pay, BIT) quickly and efficiently. Process individual sales using receipts or customize at the customer, order, or contract level. Integrated into Priority, the solution eliminates the need for endless approval waiting. Easy registration process with no additional processing, gateway, or funding providers required.

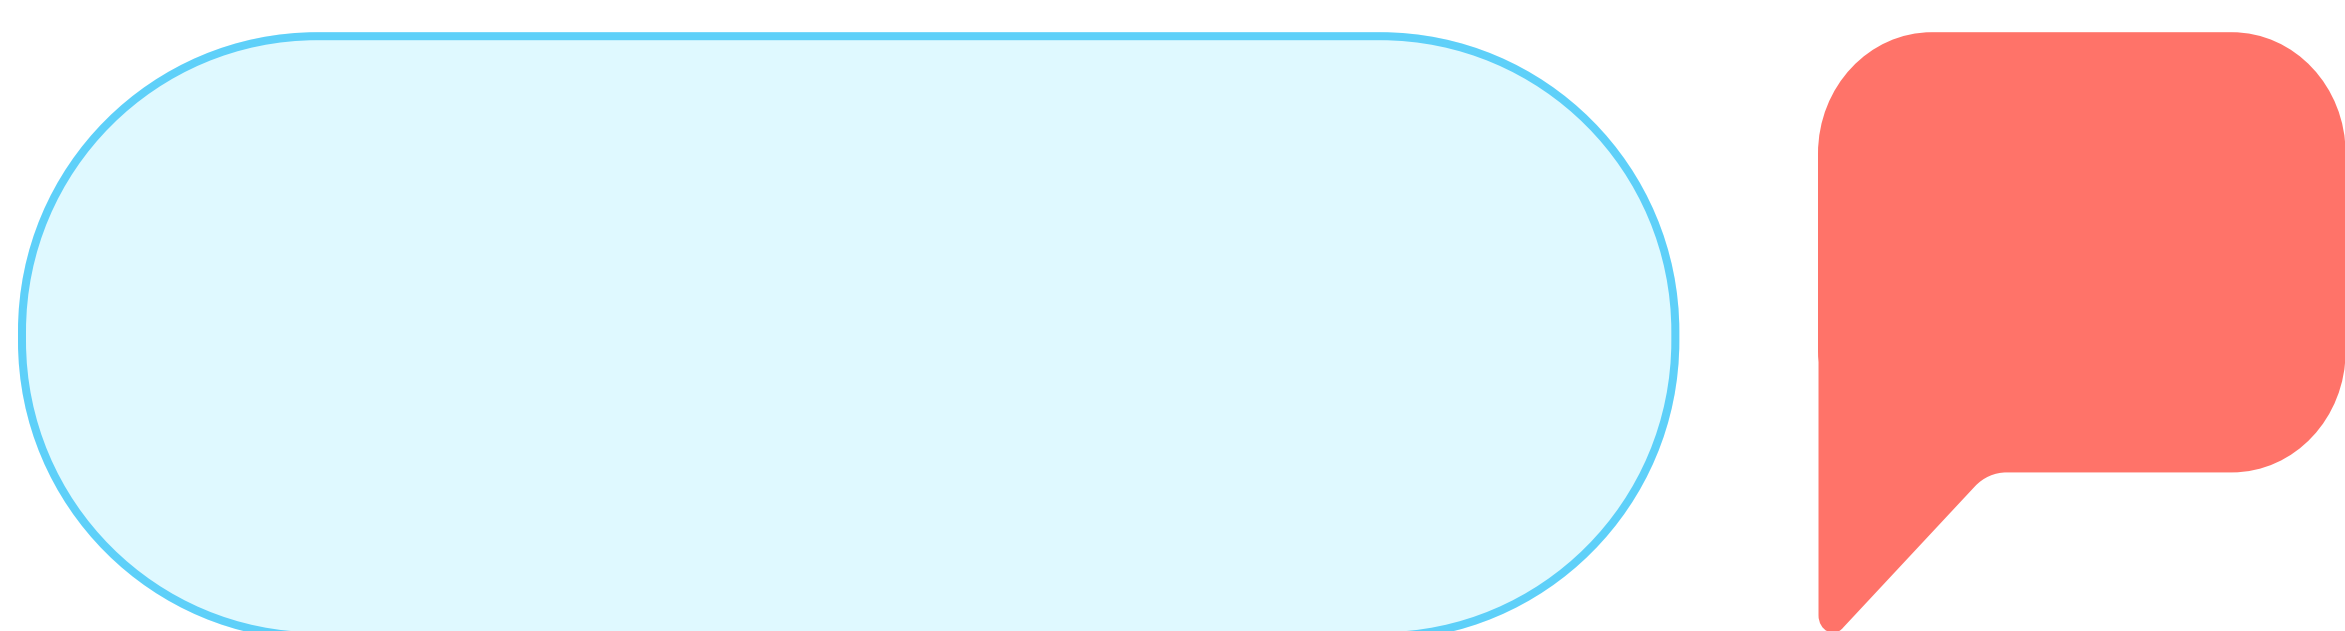

Dashboard Access

All payment data, transactions, and customer metrics are located in one place. You can monitor and track customer payments in real time and quickly see your organization's incoming payment status with an intuitive visual display.

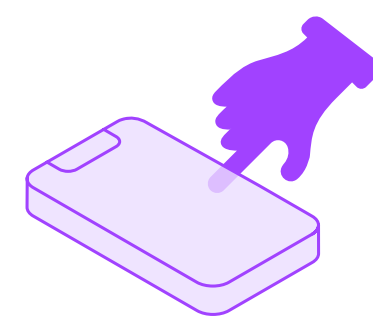

Additional Services

View and register for additional services, such as payment means ACH, PayPal, Apple Pay, BIT, e-commerce connectors (Shopify, WooCommerce), 3DSecure, if you want multifactor authentication from your buyers to reduce chargebacks.

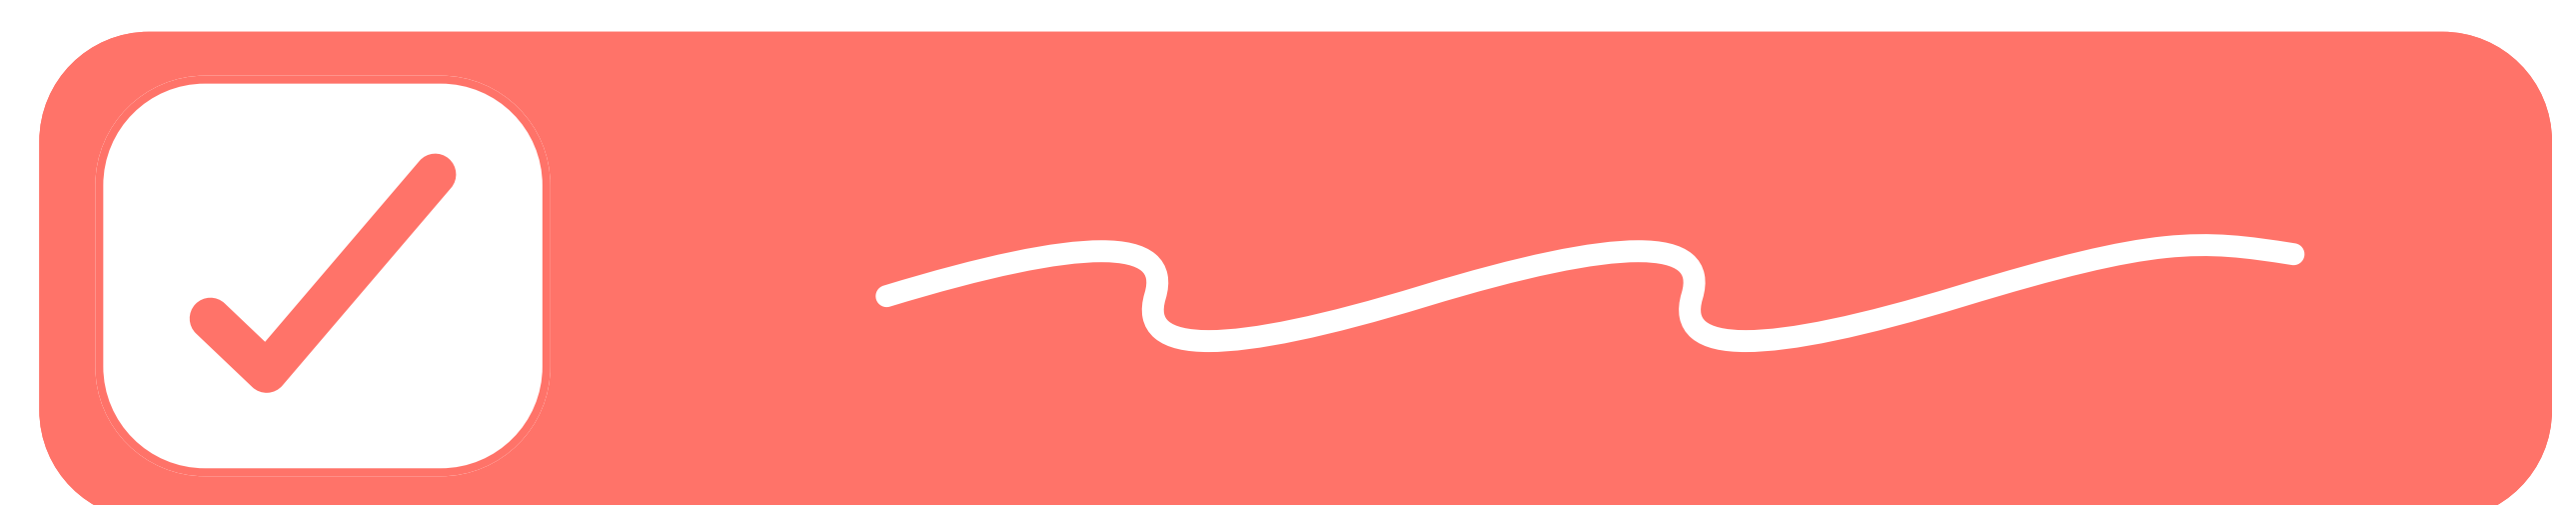

Payment Portal

With the Priority Payments Portal, you can invite customer contacts with a simple click, to a comprehensive portal where they can view and pay multiple invoices in full or partially, generate receipt history, and enrol themselves to a standing order.

Click2Pay

Click2Pay offers fast and convenient payment options. Eligible customers can pay in full or partially directly from the emailed invoice by clicking "Pay Now". The secure payment page provides a selection of payment methods. A receipt is automatically sent via email, and the transaction is automatically logged and reconciled in Priority.

Recognized by

“Priority cloud ERP’s a winner – reducing operating costs, from admin, to finance, to human resources, by nearly 20%. Thanks to Priority, we’ve accelerated our business. We don’t work harder. We work smarter. Priority has proven to be a true, cost-effective solution with an affordable total cost of ownership in a very short time.”
