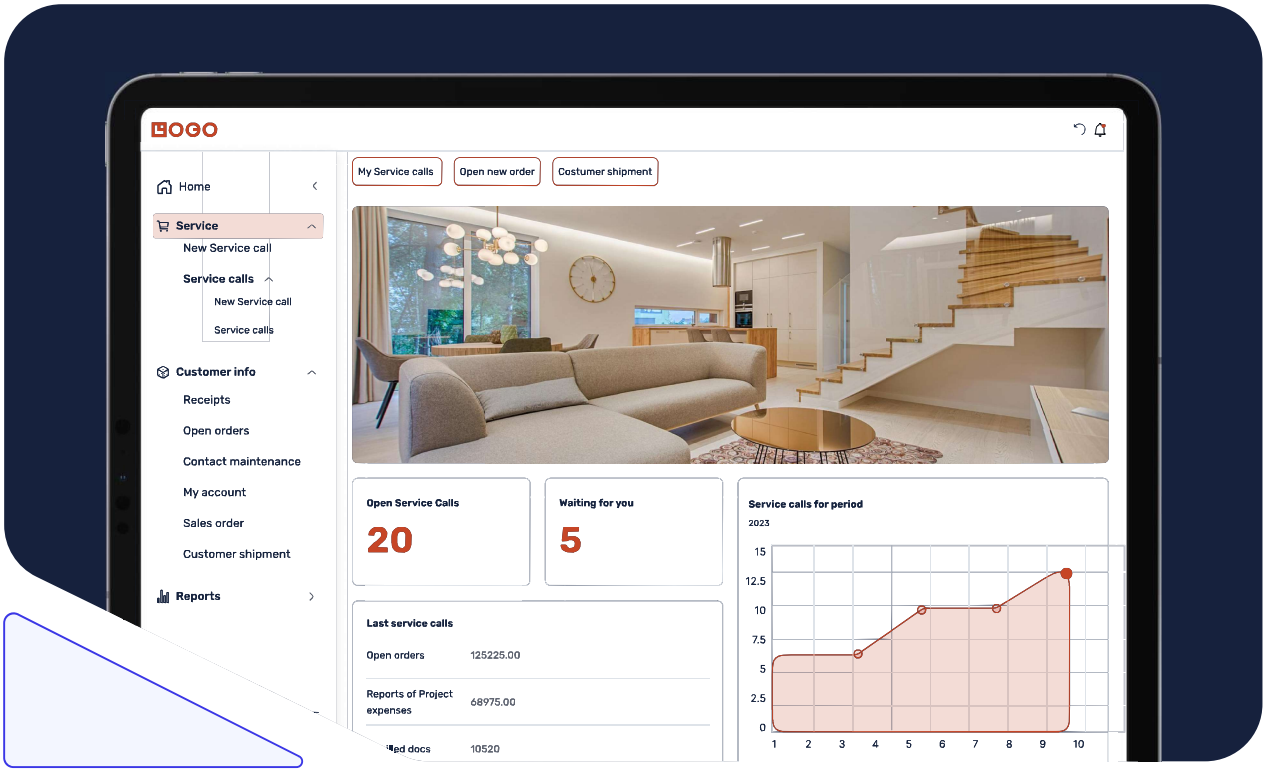
Priority ERP – Portal Generator

Effortlessly extend your business operations beyond the office with an intuitive Priority form-to-portal conversion tool

Priority's Portal Generator allows you to easily make a webpage for any business process in Priority, with no code and with no hassle. The Portal Generator is the perfect way to build your website and allow your user, customer and vendor contacts to easily check their account information, open invoices or sales orders, open service tickets, and more.

Who can use the portal generator?

The portal generator is suitable for all audiences including employees, customers, and suppliers. Creation of these portals is done in a secure manner and by means of simple settings, without code or need for programming skills: any Priority user or implementer can build and customize a portal.



Benefits

The Portal Generator helps businesses:

Enable user, vendor & customer contacts to easily check their account information, open invoices or sales orders, and more

All customizations can be done by any user that is familiar with Priority

Expand business reach and visibility and enhance lead generation by reaching new audiences

Automate workflows with a built-in, no-code web generator

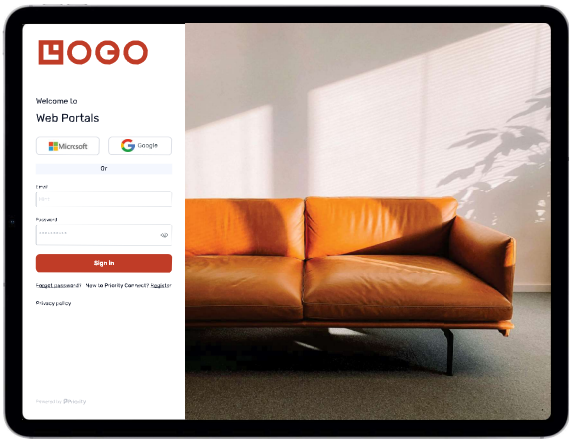
Support private developments

Alternative UI for users

Portal Generator Key Features

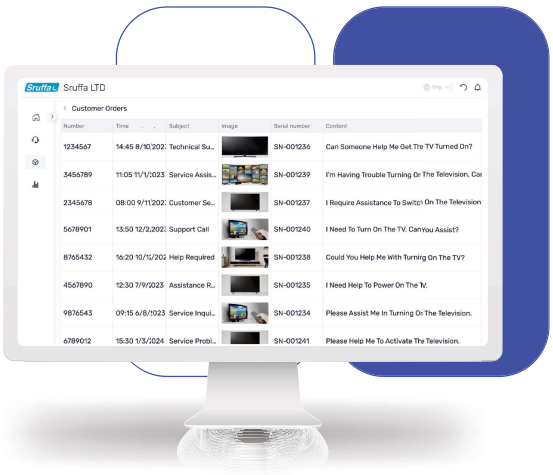
Customizable UI

Allows you to define the appearance of the portal – with your login, Logo, pictures and color schemes, so the portal matches your brand



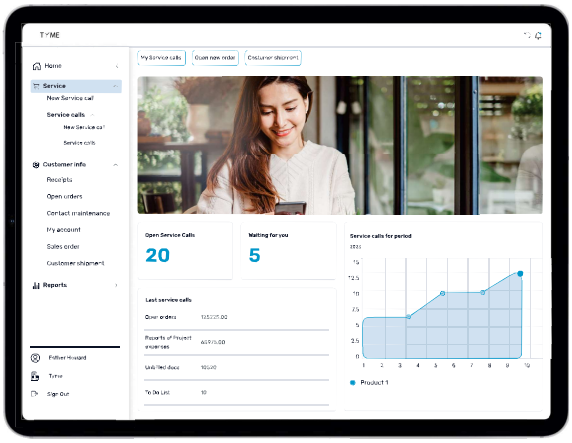
Responsive on all devices

Works on mobile, web and desktop, television (unique display to present on screens like flight list mode or list of open service calls in a lab



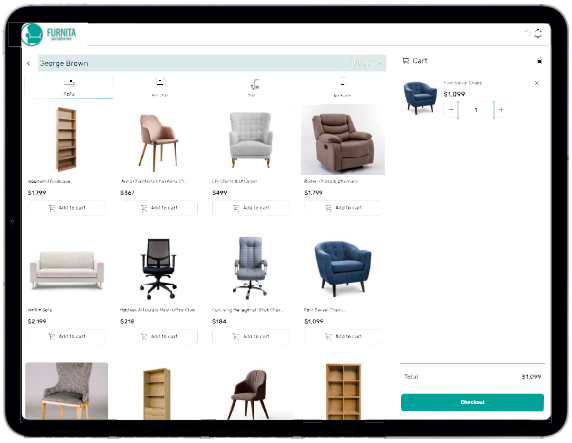
Dashboard View

For KPI's and business insights



eCommerce View

Shopping Cart experience for creating B2B orders



Schedule (Calendar) View

For tasks in your calendar with drag & drop options

Questionnaire View

A solution that can be used with service calls, for example, when a field technician finishes providing a service, the customer fills out a satisfaction survey

With Priority ERP you get:

- Unlimited possibilities with a flexible, agile, and open cloud ERP platform
- Robust functionality and products for all aspects of your business
- AI-driven insights to enhance productivity
- Real-time updates, access and visibility of your business with mobile ERP
- Join 15,000 ERP customers in 70+ countries

> **"Since implementing the modules, we have created and adapted more than 20 applications that help us manage our daily activities. With each passing day, more needs arise from the field, and the flexibility of the system and the simplicity of development allow us to address these needs within a few days. The decision to expand Priority's solutions is one of the best we've made."**
