

 Priority

Human Resources Management

Employee life-cycle management made simple

Effective human resources management is crucial in today's work environment as it helps bridge the gap between employee performance and the strategic goals of the business while facilitating the development of a motivated and skilled workforce that drives the success of that business. Priority makes the management of the employee lifecycle simple, offering a diverse set of features and functionality for efficient employee management, designed to help organizations automate, regulate and centralize their HR management processes while optimizing the employee experience.

Effective, involved and inspired employees

Priority's HRM module effectively manages key HR management tasks, from job application to when the employee leaves the company, including talent acquisition/recruitment, benefits administration, safety and health, employee assignments, training and development, performance appraisal, labor relations, compensation, and more – all from Priority.

Priority's HRM helps organizations to automate, manage and control their employees' activities, and enhance the employee's work experience. The module also includes access to employee directories and organizational charts, provides the ability to monitor upcoming vacation schedules and new hires.

Centralize HR management while optimizing employee experience

Key Benefits

Accurately Track and Record

Employee performance and KPIs, employee time off requests and approvals

Monitor

Employee performance and progress with user-friendly monitoring tools

Automate

Save time and reduce errors with automated tasks
